

# Test Equipment of Automobile Electrical Parts and Environmental Loads

**ASR-2000/ASR-3000 Series**  
500VA-4KVA AC/DC Power Source

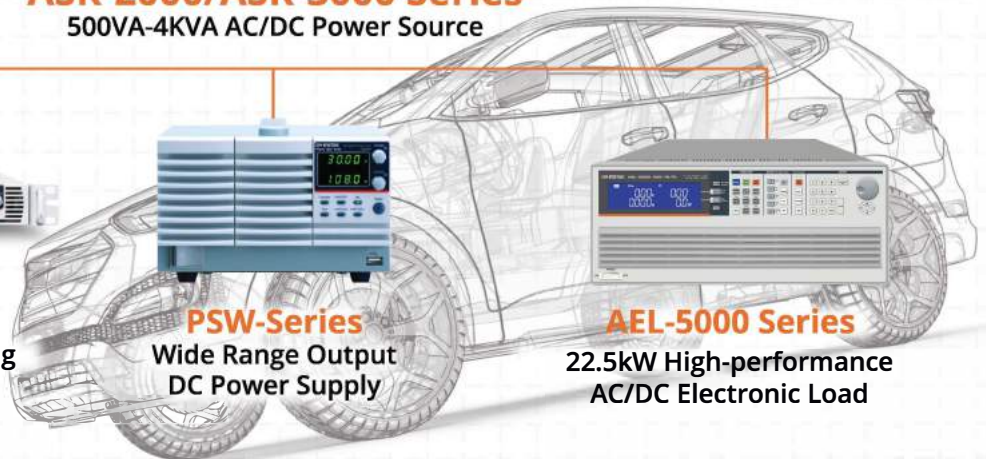

**PSU-Series**  
6kW Programmable Switching  
D.C. Power Supply

**PSW-Series**  
Wide Range Output  
DC Power Supply

**AEL-5000 Series**  
22.5kW High-performance  
AC/DC Electronic Load

Automotive Test waveforms for ISO16750 & ISO7637 included

## Reliability Test

**GPT-12000/9000 Series**  
200VA/500VA Safety Analyzer

**GDS-3000A Series**  
650MHz /350MHz BW, 2  
Input Channels, 5-2.5GSa/S

**GDM-906x Dual  
Measurement Multimeter**  
Vehicle Temperature Measurement and  
Monitoring Solution

### ISO16750-2 Electric Load Tests

Simulates a Residual Alternating Current on the Direct Current Supply

Simulate Starting Profile

Simulate Short Voltage Droptest

Simulate Slow Decrease and Increase of Supply Voltage

Simulate the Supply Voltage Profile for Reset Test

Transient Load Drop Test
